With a view of increasing the Chamber's sphere of usefulness it is suggested that a committee ne appeared to provide for a plan of unitee ne appeared to provide for a plan of unitee ne appeared to provide for a plan of unitee ne appeared to provide for a plan of unitee ne appeared to provide for a plan of unitee ne appeared to provide for a plan of unitee the appeared to the suggestion is to confer these members in this suggestion is to confer these members in the suggestion is to confer these members in the substantial leading critical network of this behavior. The difference between these two grades of membership should consist in this in honorary member should be assessed for no annual dues or other charges. This membership, conferred as an honor upon people of the fluence, should entite such members to a right to participate in all the deliberations of the Chamber, but should not carry with it the right to vote.

fluones, should entitle such mombers to a right to participate in all the deliberations of the Chamber, but should not carry with it the right to vote.

The non-resident membership should be assessed 53 a year, and as 55 tears a proportion of one baff the cost of a resident membership, such members should not conter a half a vote on the holder in addition to the right to participate in the deliberations of the Chamber. This sugrestion is founded upon the indispusable fact that an identity of interest exist between this city and the people throughout this Commonweslith, whether engaged in farming or merchandizing, and this believed that these intrests as been to grounded and protected by the a scheme of co-operation as is contemplied under this plan. In the single matter of togar, for instance, which so vitally concerns every consumer in this land, whether he be a inbourse or more chant in the country. could be given the wonderful force of organized power in directing and shaping legislation.

All the literature of the Chamber, embracing consular reports and papers upon every subject of industrial enterprise and development, would thus be at the service of our country friends, formishing them at a nominal cost valuable information to aid them in the struggle to get abed.

Such a scheme as is here suggested in the rough, with the hope that it will be perfected by an appropriate committee into a well-arranged digested plan, it is confidently believed would immeasurably increase the Chamber's capacity for usefulness. It would establish between the people of this city and the people throughout the State that community of interest and healthy personal relation which would form the basis of the highest possible development and advancement of all concerned.

This is respectfully suggested for such action as the Heart of Directors may deem wise and expedient.

The law requires that a census of the school population of the State shall be taken every five years. This population, according to the census of 1885, was 610.371. The returns of the count made this year have been received from all the counties and cities except seven. Leaving out the seven counties the returns show that there are 40.256 more children of school age in the State in 1890 than in 1885.

make his appearance. THE CHARGE AGAINST SULLY. Whether a sufficient case can be made against Sully to secure his indictment remains to be seen. The chances are rather against it. There is very little testimony so far as the public knows that can be brought forward to criminate him. It is possible that he may be indicted, but unless new and material witnesses can be procured it seems quite certain that he cannot be convicted.

GYMNASIUM CLASSES.

The class-work will include dumb-bell, Indian-club, and wand drills; work on the horizontal and parallel bars and pulley-machines, and the other usual exercises. Men's classes will meet on Tuesdays, Thursdays, and Saturdays at 8:30 P. M., with a business-men's class on Fridays at 6:30 P. M. The class for boys will meet on Mondays, Wednesdays, and Saturdays at 5 o'clock. Boys are now being enrolled for this class, application for membership in which may be made any evening between 6 and 7 o'clock from now until October 1st.

TO EDUCATE THEM. The educational work of the association will commence about the middle of October. Arrangements are now being made to have classes in book-keeping, stemography, neamanship, elocution, yoosl mu-

sic, French and German, and perhaps other branches. These classes are free to any young man who is a member of the asso-ciation. They are a most beneficent fea-ture of the institution, and enable many worthy young men who are engaged du-ring the day to spend their evenings in the pursuit of knowledge under compe-tent instructors.

The 'social and intellectual features of the work will be well provided for. A course of tourteen lectures and entertainments will be given, for which some of the best talent in the country has been engaged. The course will be opened October 18th by Mr. Peter Von Finkelstein, who greatly pleased our people last year with three of his lectures. He will be followed by others equally entertaining. Besides this course it is hoped to have frequent meetings during the year of a social nature, which will be enlivened with music, and short, brighttalks by popular speak. LECTURES AND ENTERTAINMENT.

The strikers say that Mr. Wilbur recently has spent much time in the shops and would give them orders regarding repairs contrary to those of Mr. Hewitt. They thought the duties of the Superintendent were upon the road to look after the running of the cars and not in the shops, and claim that Mr. Wilbur is not a mechanic and they could not work by his instructions. They also charge Mr. Wilbur with favoritism toward two or three negroes employed in the shops.

It seems that the duties of Mr. Wilbur and Mr. Hewitt were not very clearly defined, or at least the men in the shops were in some doubt as to whether or not the Superintendent had a right to interfere with their work. A conference was neld and a committee was appointed to wait upon Fresident Fisher and lay the facts before him.
